

# STYLING ANALYSIS WORKSHEET

Make a private Pinterest board of 20 images reflecting the type of styling you are drawn to. It's okay if the subject matter doesn't relate to your brand, focus on the aesthetic. You can also do this in your sketchbook or on a piece of paper by cutting and pasting images you find in magazines.

For each image answer the following questions:

1. List 3-5 things you like about these images.

- a)
- b)
- c)

2. Is there anything about the images you don't like? For example, you like other things about the image but the marble backdrop isn't doing it for you.

3. What do the images on your Pinterest board accomplish that you're missing in your photography right now?

4. Focus on the photos that have props and think about how they relate to the subject. Describe their placement.

Once you're finished answering the questions about each photo, list five things you learned completing this worksheet that you'd like to bring to your own photos.

- a)
- b)
- c)
- d)
- e)
